

Joma Padel Collection 2026

HISTORY

The turning point in the company's growth was marked by the introduction of color in football. Fructuoso López launched the first colored boots in the nineties. They stopped being black to be dyed in other colors and forever revolutionize the playing field.

“IN 1965 I FOUNDED JOMA WITH THE COMMITMENT TO DEVOTE ALL MY EFFORT, TIME, AND LOVE TO THE COMPANY. 60 YEARS LATER, THAT IS EXACTLY WHAT WE DO.”

D. FRUCTUOSO LÓPEZ

SCAN ME

TO KNOW MORE

1965

Joma was born in 1965, founded by a young entrepreneur from Portillo de Toledo. In 1969, the first assembly line was established in Fuensalida with 20 employees.

1983

Joma faces the challenge of globalization. Attends the ISPO in Munich for the first time, the most important European fair in the sports sector.

1996

Joma launches in 1996 the famous campaign “COLOR IN FOOTBALL”. Revolutionizes the global market for football boots. Alfonso wears white boots, Morientes surprises with red ones.

2000

Joma's product distribution expands to more than 140 countries. This makes it the leading Spanish sports brand and enters the top 10 worldwide. It also begins the opening of its own stores and corners.

2016

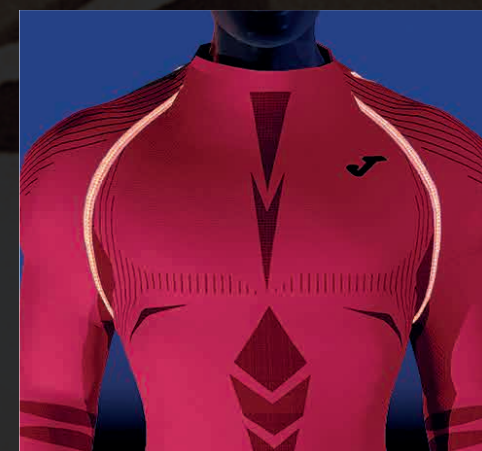

Joma enters Rio 2016 dressing 10% of athletes, 18 federations, the COE and 8 committees. With 10 subsidiaries (Spain, Italy, USA, UK, Germany, Mexico, Norway, Denmark, China and Russia) and 20% annual growth, it reaches 4 million footwear and textile references that year.

2017

Joma implements new robotic machinery in its international logistics warehouse with the aim of streamlining work, from product storage to package preparation for shipment worldwide. It manages to deliver 87% of sales ahead of schedule, reducing the margin of error to 1%.

2020

Joma researches and develops to ensure that all its technologies are proprietary, constantly innovating to enhance performance and durability. Quality is its essence and the foundation of every product.

2021

At the Tokyo 2020 Olympic Games, Joma outfits more than 1,500 athletes from 12 countries, including Spain, Portugal, Morocco, Jordan, Kazakhstan, Honduras, Malta, and Mauritius.

2023

The largest store expansion in its history. The Brand Store concept drives a strong national and international presence, with renewed interior design and optimized spaces.

2025

The brand expands to over 140 countries through stronger brand image and increased R&D investment. At Paris 2024, it sets a record by outfitting 15% of athletes, becoming the Spanish brand with the greatest global presence.

JOMA PADEL HISTORY

The **Slam** model is launched, with the sponsorship of world No. 1 **Juani Mieres**.

Joma becomes the official footwear of the **FIP** and **WPT Challenger**.

Joma becomes the official footwear of the **A1Padel** circuit.

Joma strengthens its position as a key player in the global padel scene. With pro-level gear designed for grip, speed, and stability, Joma combines innovation and performance—tested by athletes, built for every point.

2013

The **first padel footwear** line is launched, a milestone for Joma's diversification. First sponsorships of Joma to **Martin Dinunno** and **Franco Stupatuzck**.

2014

2018

Joma becomes the official footwear of the **WPT** circuit.

2021

2022

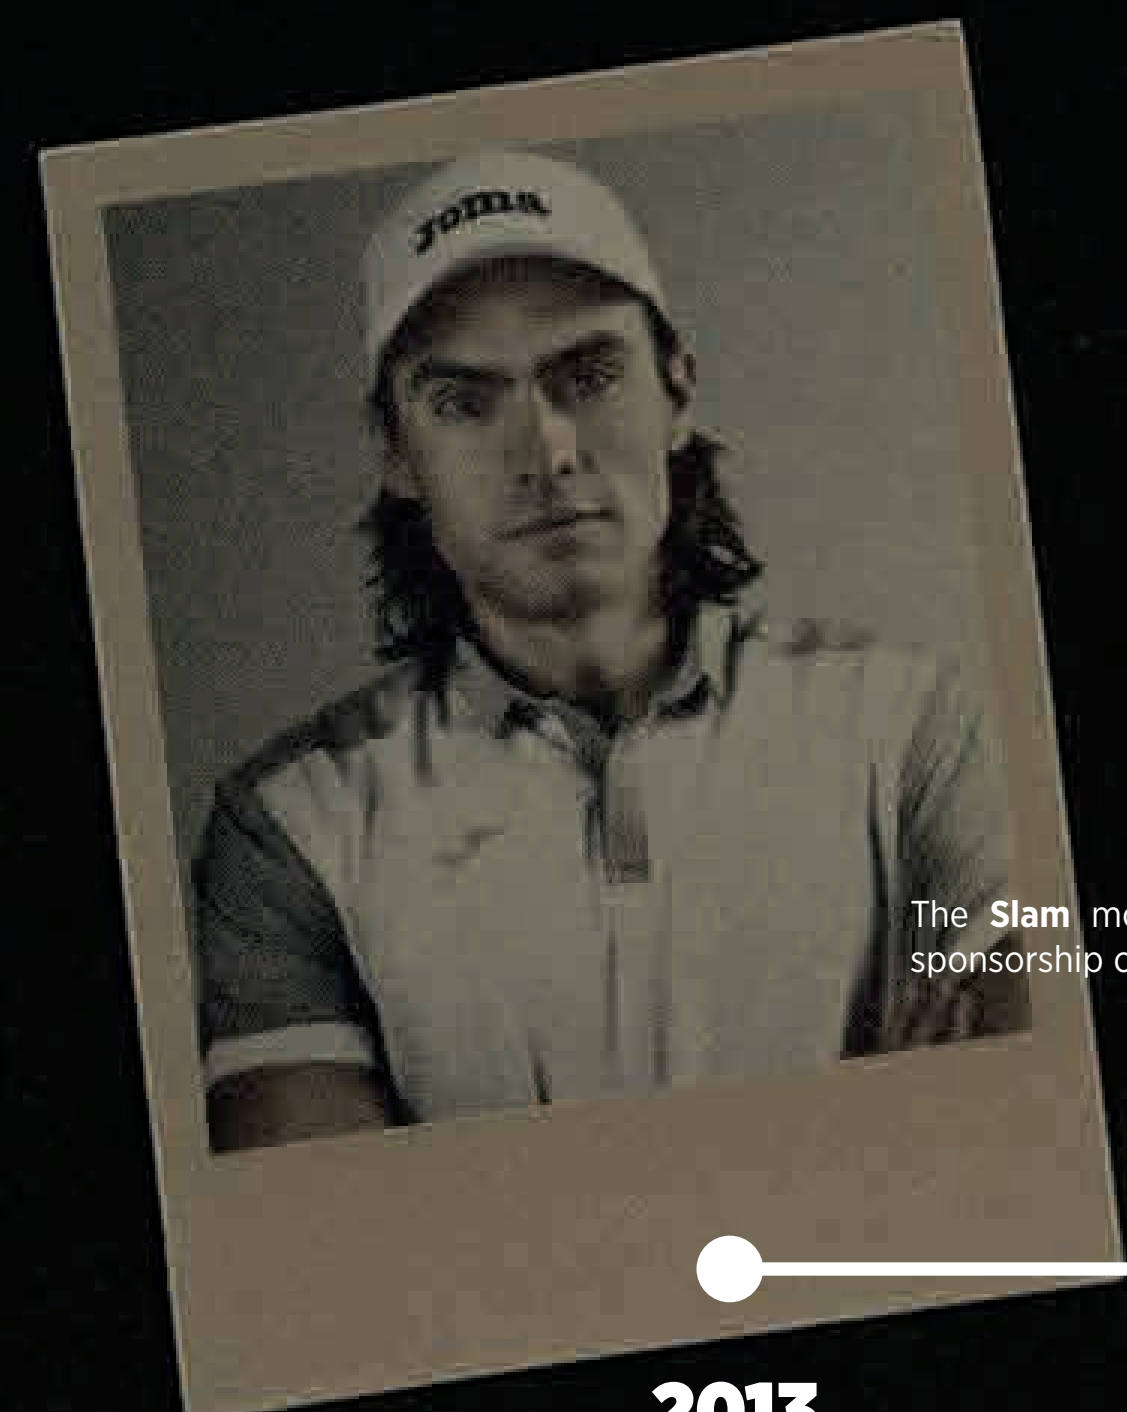

Joma enters the market with its first **360° Collection of Padel Rackets**.

2023

2024

Sponsorships are signed with **Juanlu Esbri** and **Vero Virseda**.

JOMA PADEL TECHNOLOGY

POWER MEETS PRECISION

Every Joma racket is engineered to deliver the perfect balance between control and power. Hybrid frame geometries and optimized weight distribution ensure a versatile response, allowing players to adapt effortlessly to both offensive and defensive phases of the game.

COMFORT AND VIBRATION CONTROL

Advanced multi-layer structures and specialized EVA compounds absorb impact vibrations, reducing arm fatigue and improving overall comfort.

AERODYNAMIC PERFORMANCE

Innovations such as Aerobump Tech and Speed Hole System optimize air flow around the frame, enhancing maneuverability and accelerating racket speed. and greater precision on every shot.

SPIN AND SURFACE GRIP

Joma's 3D Spin and Rough Touch technologies maximize ball contact and grip. Players gain more control over spin effects like top spin, slice, or side spin, expanding their tactical range and creativity on court.

SCAN ME

TO LEARN MORE

Each Joma racket is the outcome of extensive research at the Joma Lab and close collaboration with professional players. From entry-level models to top-tier competition rackets, Joma technology guarantees stability, power, and control. Performance built to elevate every style of play.

PADEL RACKET TECHNOLOGIES

DUALTECH frame

Its high-resistance carbon structure filled with EVA absorbs vibrations, reinforces frame rigidity, and delivers a more stable and precise hitting feel. Ideal for players seeking both performance and comfort in every point.

AEROCORE frame

100% carbon frame, consistent with the rest of the 2025 collection. Provides extra durability and protection.

FRAME

CTRLTOUCH

Smart perforation layout that adjusts weight and flexibility to achieve a smoother response and enhanced precision for control-oriented play.

ATTACKTOUCH

Intelligent drilling system that redistributes weight and surface flex, providing refined control without losing sensitivity or fluidity in powerful shots.

TOUCH

SPEEDHOLE system

Two strategically positioned channels in the heart of the racket improve aerodynamics and handling. This innovative system reduces air resistance for quicker, smoother swings, facilitates direction changes and precision shots, and optimizes the racket's balance for superior control without compromising power.

ROUGH
TOUCH

Rough-textured surface that increases ball grip for enhanced spin generation. Ideal for applying top spin, slice, or side spin in technical shots such as volleys, bandejas, or spin smashes. It also improves touch and accuracy in slower shots like drop shots or lobs, offering better ball release and overall control.

AEROBUMP tech

Technology based on strategically placed grooves along the frame, designed to optimize aerodynamic flow during impact. This innovation reduces air resistance and enhances maneuverability, allowing faster, more accurate, and smoother movements on court.

JOMA
SPIN 3D

Three-dimensional relief on the racket surface increases spin and control. The 3D texture enhances grip on the ball for more spin potential, facilitates top spin and slice shots, and provides greater precision and control on every stroke.
